Re: 115 Mercury Optimax problem If you were getting your reading from the vapor seperator you were reading the low pressure (boost) pump, which is correct for that pressure. You should post your serial number because your air pressure might need to be 95 +/- 1 psi and your fuel pressure should be around 110psi.

A failed Mercury Optimax air compressor will send debris to the air injectors. This debris can limit the operation of these injectors and cause all kind of performance issue. It is therefore recommended that you have the Optimax air and fuel injectors at least flow tested and if needed cleaned in the event of an air compressor failure.
