You can also use posters
to indicate cleanup
areas and remind

workers of the importance of 5S. Red tags: Sorting, the first step of 5S, is designed to help go through the items in the space and decide what to do with them. 5S red tags are a tool used during this process to identify objects that may need to be removed, recycled or relocated. The idea of using red tags is to place

items you may be unsure about in a kind of "holding area" to give you time to evaluate their necessity.

5S and Visual Management - Six Sigma Daily

5S is sometimes called the five pillars because just like the physical pillars that hold up a structure, 5S has five

elements that support the effectiveness of the system. And just like the pillars of a building, if one was to weaken or fail, the entire structure would fall. The five steps/pillars of 5S are: 1 Sort 2 Set in Order 3 Shine

5S Guide - Kansas State University
5S is one of the most

widely adopted techniques from the lean manufacturing toolbox. Along with Standard Work and Total Productive Maintenance, 5S is considered a "foundational" lean concept, as it establishes the operational stability required for making and sustaining continuous improvements.

At the end of of a 5S implementation you will see characteristic things such as policy manuals, glow-in-the-dark tape or photoluminescent tape on the floor, colored bins, red tags, and 5S walks taking place. In the end, it should all add up to efficiency.
