The way you feel about your body is your affective body image. This relates to the amount of satisfaction or dissatisfaction you feel about your shape, weight and individual body parts. The way you think about your body is your cognitive body image. This can lead to preoccupation with body shape and weight.

~~Body Image - National Eating Disorders Collaboration~~

Body dissatisfaction or feeling negatively about appearance or abilities is a common experience across different racial and ethnic groups. Body image is a multi-dimensional construct; however, the tools used to assess body image in research often focus on body weight or shape. This can be limiting when trying to understand body image and ethnicity, as people from different groups have different body ideals (102,103).

Body image is closely linked to mental health problems such as body dysmorphic disorder (BDD) and eating disorders like anorexia and bulimia. BDD is a mental health problem where a person spends a lot of time worrying about flaws in their appearance that are often unnoticeable to others, to the point that it affects their daily life (14).
