summary, a two digit code.

IP Ratings Explained: The "waterproof" IEC standard 60529 ...

The IEC 60529 test standard considers a rating of two as protection from solid objects greater than 12.5 mm. An IP of three means IP ingress protection against solid objects greater than 2.5 mm. Enclosures rated four offer protection from items that are solid objects greater than one mm.

The IP Code, or Ingress Protection Code, IEC standard 60529, sometimes interpreted as International Protection Code, classifies and rates the degree of protection provided by mechanical casings and electrical enclosures against intrusion, dust, accidental contact, and water. It is published by the International Electrotechnical Commission (IEC). The equivalent European standard is EN 60529.

The protection of enclosures against ingress of dirt or against the ingress of water is defined in IEC529 (BSEN60529:1991).

Conversely, an enclosure which protects equipment against ingress of particles will also protect a person from potential hazards within that enclosure, and this degree of protection is also defined as a standard.
